Genee Tilt & Touch Table

GENEE HIGH-LOW

Game-Led Learning

The Genee Tilt & Touch table is a great addition to any Nursery, Key Stage 1, 2 or SEN classroom. It inspires fun learning with subject specific content. Children learn and engage through game-led learning creating an environment that encourages collaboration and team building.

The Tilt and Touch Tables are pre-loaded with a huge range of educational software that encourages numeracy, literacy, creativity, letter formation, music, art and much more. Many of these programmes are multi-touch, enabling several children to use the screen at the same time.

The Tilt and Touch Tables can be used in a horizontal position as a table, allowing more students to interact together. Alternatively, the tables can be tilted through 75° to enable students to use it more comfortably sitting down or if they are playing on their own. The Hi-Lo version of our 42" Tilt and Touch Table can be placed in the vertical position. The height can be altered, which allows comfortable access for taller students or for wheelchair access. The Tilt and Touch Table range comes in three configurations, all with a built-in Windows PC. See overleaf for full specifications.

Key Features & Benefits

Painted with Anti-Bacterial Paint
All tables are painted in anti-bacterial paint, therefore they won't harbour germs and can be easily cleaned.

Tilting and Lockable Screen
The Tilt and Touch Tables can be tilted through 75 degrees before being locked in place. Making both viewing and touch more comfortable for children using it.

Built-In PC
A fully built-in PC is included on all Tilt and Touch Tables. Saving you having to connect to external computer devices for uploading and displaying content.
Lockable Safety Wheels
Lockable wheels support easy and safe use within the classroom environment and allow multiple users to work safely on any Tilt and Touch Table at the same time.

G-Safe Built-In
Teachers have full control on the table, they can create black and white lists for all browsing as well as being able to create pin access so that a child does not find themselves in an area they shouldn't be.
